Summary

I'm mostly a self taught web developer. I have continuously challenged myself to grow, and personally developed my skill-set in web development. Initially I started by reading books on coding and programming, I then progressed to coding camps and studying web development with Udacity.

Projects

- Weather App – uses the openweathermap API to generate the temperature from the zip code entered by the user. This project uses HTML, Javascript, and CSS. <https://github.com/0silverback0/weather-app>
- Inventory app – a CRUD app that uses HTML, CSS, PHP, and MYSQL to take a SKU number store it in a database, then dynamically display the SKU in a list <https://github.com/0silverback0/Inventory>
